

It happens that Kenya has the darkest shade portion on the Malaria Deaths in Africa Dashboard. I clicked on Kenya, and it shows the average death per year and day which are 27896, and 76.43 respectively. The highest recorded number of deaths was in **2003** with over 50,000 deaths. The mortality rate was much lower in the year 2011-2014.

Malaria Death in Angola

Insight 3

The average death in Angola per year when hover over and clicked was at 11,469 and 31.42 average daily deaths. **2003** was the most recorded number of deaths which was about 38,000 deaths and reduction of deaths in the subsequent years.
